

## Would you like to see traffic calming measures introduced on the main roads in the Parish?

Scopwick	Kirkby Green
*No - road bumps *Yes - Electronic reminders of speed as ... villages does seem to slow traffic significantly, making it much safer for pedestrians - especially with young children - on our 'old' narrow footpaths	I would not like speed bumps or any other sort of constructed traffic calming, but i do think the police should set up a speed trap as some driver do not observe the speed limits
Not had a child in this situation but see the children coming off secondary school bus dodging traffic to cross the B1188 or 1198 not sure which, to the main part of the village. In the winter this is worse and is an accident waiting to happen as the road has become so much busier in the last 20 years	Illumiated speed signs specifically through Kirkby Green as traffic often reaches national speed limit and more. Restriction on heavy traffic through Scopwick and Kirkby Green. Hass been a dramatic increase in construction vehicles again well in excess of 30mph. Danger to children and pets in Kirkby Green
1. Speed warning digital displays 2. More regular speed check group actions	Restrictions needed due to heavy traffic from quarry causing damage to road surface. This traffic is also travelling in excess of speed limit and without consideration to other road user
20mph limit	Speed restrictions from level crossing Improve Royal Oak junction
30mph limit	If it could stop heavy lorries so many at the moment, spoiling grass verges also breaking up the road edges
40mph on B1188. Improved road access/visibility at T-junction on B1188/main street.	As to my earlier comment, stop the heavy goods vehicles, specifically quarry lorries using the village as a cut through. My house shakes as they thunder past. They also have a detrimental effect on the state of the road
Absolutely - speed camera would be best on the main road	Yes, speed cameras
Absolutely! in particular on the B1188. it's ridiculous the speed vehicles race through there, not to mention extremely dangerous. A speed camera or permanent speed monitoring system along with a reduction of the speed limit to 30mph is really needed. All the way from the bend at the top of hill to turning to Navenby.	Its a great shame that the parish council has never taken public safety as the highest priority within the parish. Cars, lorries + tractors speed through Kirkby Green daily at ridiculous speeds, as there is no real traffic calming measures in place, just a couple of pathetic 30mph warning cardboards. One day someone will get badly hurt. I'm glad i won't be feeling guilty
B1188	A speed restriction of 30mph, at the railway level crossing at Kirkby Green
B1188 - slow down traffic on main road through village	Weight limit on roads
B1188 speed reduced and signs put further out the village to warn to slow down	Motorists + Heavy lorries speeding through the village
Electronic speed of vehicles displayed	Average speed cameras

Scopwick	Kirkby Green
Ban lorries	Speed limit up to 60 miles between Scopwick / Kirkby green, bring down to 40, some drivers race between and don't slow down when reaching edge of villages
By the Scopwick Church	Speed Cameras Flashing speed signs
Fixed speed cameras	Please refer to Question 5, 10
Flashing signs when limit is exceeded	Make road from Timberland to Kirkby Green/ Scopwick 7.5 tonne only
Heath Road 40mph from R.A.F. Digby to Scopwick Speedbumps etc.	Please extend speed restrictions
Heath Road PLEASE.	Lights Mini - roundabout Speed bumps
Main road	Kirkby Green
Main road through Scopwick should be 30mph	It is dangerous walking into the village from our house - especially crossing the main road from the layby to the village green a footpath would make it safer
Main street	Occasionally police speed trap
Main Street	Traffic through Kirkby Green 7-9am and 4-6pm is very fast and many times I have not been able to pull out my drive safely due to others speed and recklessness.
Main street Scopwick, too many big lorries + cars going too fast	Many vehicles and lorries exceed the speed limit through our village.
Mini roundabout at junction of Heath rd and B1188 Pinch point on Main st Permanent speed indicator signs which speed of vechile	Speed bumps would increase the vibration from heavy lorries to houses adjacent to the road.
Mini roundabout at main street junction of the B1188 as currently dangerous when exiting main road due to lack of visability around the corner into speeding traffic.	
My opinion is that the more we encourage walking - dog walking the greater the risk of an accident occurring.	
No - Just the speed limit enforced by random speed traps and signs saying they take place	
... along main street to limit speed especially for heavy lorries from quarry	
On the main Lincoln road to improve safety for cars and pedestrians	
Pedestrian crossing on B1188 and Main st. Scopwick. Speed awareness recording vehicle speeds through both villages	
Pedestrian crossing on B1188 and Main street Scopwick. Speed awareness recording vehicle speeds through both villages	
Restrictions on weights of HGV vehicles and reduced speed limit	

## Scopwick

Raised humps, sleeping policeman on the main B1188 to slow traffic down. The traffic has increased, along with their speed making it dangerous to cross the road

Reduced flow i.e. down to one lane along main street. In several places, Pelican crossings at Beck crossing points

Reduced speed limit on the main road to Lincoln to be made longer. Removal of stone building on the east side of the crossroads opposite the pub visibility would be much improved. Maybe traffic lights at the crossroads?

See Q5 answer Double yellow lines around bend in road next to church - if people are parked on church side and you need to go around then it is impossible to see around corner = dangerous. Sign post to parking near village hall/ make the parking there better to stop parking on verges - use field more effectively.

Sign (please slow down)

Sleeping policeman along Main Street to reduce the risk of further accidents and before there are fatalities

Sleeping policeman on Heath Road

Slow down the motorbikes on B1188 during the summer month Speed of vehicles on main street

Slow traffic on B1188. Average speed camera from start to end of village on B1188. People turning off 1188 slow down anyway so only need to measure people passing through

Speed bumps

Speed camera on B1188 between Heath road and Main street

Speed indicators

Speed limits

Speed limits and reductions - 30mph on B1188, 20mph on village side roads

Speed reminders - showing drivers actual speed

Speed traffic comes through on the 1198 is terrifying and needs addressing

Speed Warning

T junction by the pub and the crossing by the Scopwick church

The 40mph going through village on B1188 needs to be a lot slower

The main road from Lincoln to Metheringham entering Scopwick, cars drive too fast

Yes - but not traffic/ road bumps

## Scopwick

Speeding is a major concern. I understand the P.C. are trying to help with new traffic speed guns but this problem happens when the traps are not being used. When did the village last have SID? The junction with the B1188 is deadly. There must be improvements made here asap or i fear a major accident happening.

The main road. Heavy goods vehicles go over 30mph along this stretch of road. There is a blindspot area near the Church and any children or elderly crossing the road there could so easily become a fatal casualty (the area near the post box).

The speed limit on B1188 is too fast at 40mph. It should be reduced to 30mph and there should be measures put in place to give better visibility to cars turning out of main street

Too many speeding vehicles going through the village. if the village grows (hopefully not too much) this will increase traffic

Upon entering the village from the north + south on the B1188 - but not an island in the middle of the road, have a restriction to give way to traffic coming other way

With the junction of main street and B1188 being a blind corner, traffic lights would have a dual purpose - safety and traffic calming

Yes on the main road approaching the pub from Sleaford and entering the village from Blankney to vicarage lane

Yes, a reduction to 30mph on B1188 through Scopwick with speed camera, and vehicle activated speed devices on B1191 out to village boundary
